

MUSA QURESHI

Software / AI Engineer

Bhopal, India | +91 6263473208 | musaqureshi0000@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [X](#)

PROFILE

Full-stack engineer skilled in Python/FastAPI, PostgreSQL, and React/Next.js, with applied AI engineering experience in RAG and multi-agent systems. Proven track record architecting and shipping multi-service platforms end-to-end, from database design to production UI - both independently and as technical lead, delivering fast, reliable results under real-world constraints.

TECHNICAL SKILLS

- **Languages:** PYTHON, C++, JavaScript/TypeScript, SQL
- **AI Engineering:** LLM Applications, RAG, Multi-Agent Systems, LangGraph, LangChain, Agno, MCP
- **Software Development:** React, Next.js, FastAPI, REST APIs, PostgreSQL, Redis, Microservices, Object-Oriented Design
- **ML & Data:** PyTorch, Scikit-learn, NumPy, Pandas
- **Infra & Tooling:** Docker, CI/CD, Linux, Git, GCP, AWS, OpenTelemetry, Vector Databases, System Design

PROJECTS

AxiosAI — Full-Stack + Core Architector

Jun '26 – Sep '26

🏆 **Winner, OregonHacks** — international hackathon | ET AI Hackathon | BuildX'26 IIT Kharagpur Grand Finalist | [GitHub](#) | [Live](#) | [Demo](#)

Stack: Python, FastAPI, LangGraph, Next.js, PostgreSQL, Neo4j, pgvector, Docker, AWS

- Architected a **multi-service enterprise knowledge platform end-to-end** — designing the backend API layer, graph database schema (Neo4j), and vector search layer (pgvector) to unify fragmented enterprise documents into one searchable system.
- Built an agentic AI system using **Grounded RAG, knowledge graphs, and multi-agent workflows to deliver explainable, citation-backed enterprise intelligence and decision support; containerized and deployed** the full stack with Docker on AWS, built REST APIs and a Next.js frontend, and debugged cross-service integration.

Care Grid — Tech Lead

Dec '25 – Jan '26

EY Techathon 6.0 Pre-Finalist | [GitHub](#) | [Live](#)

Stack: Python, LangGraph, FastAPI, React, PostgreSQL, Google Maps API, NPI Registry, Docker, NeonDB, Railway, Vercel

- Led design and development of a **multi-service platform** automating data validation, enrichment, and risk assessment, improving audit **readiness by ~40%** through modular, testable service architecture.
- Integrated third-party APIs (Google Maps, NPI Registry) via clean service abstractions, cutting **manual verification effort by ~60%** almost while **reaching 90%+ data accuracy**; wrote and maintained unit tests across core services.

WORK EXPERIENCE

Python & ML Intern — SureProED (Remote)

Jul '25 – Feb '26

- Built and debugged Python **data pipelines for preprocessing** and feature engineering across **25+ real-world datasets**, writing reusable, testable code for structured and unstructured workflows.
- Designed a sequence-to-sequence Neural Machine Translation system from scratch - implementation, evaluation, and hyperparameter tuning — **delivering 5+ end-to-end software & ml solutions** in collaboration with a team.

AI Support Engineer — Outlier & Micro1 (Part-time, Remote)

Dec '25 – Present

- **Evaluate** softwares, llms and model's outputs for correctness, reliability, and quality against defined test criteria, contributing structured QA feedback used to improve production model behavior.

AI Intern — Edunet Foundation (Remote)

Apr '25 – May '25

- Built and **shipped a live**, reasoning-based agentic chatbot with integrated SEO capabilities, deployed directly into the organization's leaning & education website selling online courses.
- Work on the chatbot in production serving 2,000 –10,000+ monthly visitors, tuning for response reliability and performance under real user load.

CERTIFICATIONS & HONORS

- **Winner — OregonHacks (international hackathon)**
- Machine Learning Specialization (Stanford & DeepLearning.AI) | **Microsoft Certified: SQL & AI**
- Oracle Cloud Infrastructure Generative AI Professional (92%) | **Codeforces Specialist (~1500)** | 200+ LeetCode problems
- Open Source Contributor (Aden Hive & other OSS) | **Harvard Aspire Leadership Program (2026)** | McKinsey Forward Program
- **Technical Writer** — publishing articles on AI infrastructure and agentic systems on Medium

EDUCATION

B.Tech, Computer Science — Bansal Group of Institutions, Bhopal, India

Expected June 2027

- CGPA: 7.91 / 10; SGPA: 8.5 / 10;
