

Musa Qureshi

Bhopal, India | +91 6263473208 | musaqureshi0000@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

Languages & Development: Python, C++, SQL | FastAPI, React, Streamlit | JavaScript, HTML, CSS

ML & Data: Pandas, NumPy, Scikit-learn, MLflow, OpenCV, TensorFlow, PyTorch

AI & LLMs: LangChain, LangGraph, LangSmith, Agno, RAG, Agentic Systems, Vector DB, Hugging Face

Others: Git/GitHub, Redis, n8n, Docker, Linux (Basics), Databricks (Basics), Gemini API/SDK, Prompt Engineering

PROJECTS

BLOG.IO — Agentic Blog Automation System | [Preview](#)

In Progress

Tech: Python, Next.js, Clerk, PostgreSQL, FastAPI, Redis, LangGraph, LangChain, Gemini, Structured Prompting

- Designing a deterministic **multi-agent** platform for **autonomous** research, writing, optimization, editing, and publishing of long-form blog content.
- Implementing a agent orchestrator to control execution order, context passing, version tracking, and failure handling across planner, research, writer, SEO, editor, and publisher agents.
- Building a **human-in-the-loop** editing workflow with structured outputs, version history, and controlled AI rewrites for production-grade content pipelines.

CARE GRID — Agentic Provider Intelligence SaaS Platform | [Preview](#)

Dec 2025 – Jan 2026

Tech: LangChain, LangGraph, React, Clerk, FastAPI, SQLite, Multi-Agent Systems, APIs(Gemini, GMaps, NPI), Vercel

- Built an **agent-driven AI system** to automate healthcare provider data validation, enrichment, risk scoring, and directory generation at scale, reducing manual QA effort and improving data reliability.
- Reduced manual verification effort by **~60%** and improved provider data accuracy and audit readiness by **~40%** using agent-driven workflows with **confidence scoring** and risk classification.
- Implemented **batch-processing** pipelines, **agent orchestration**, and an analytics dashboard to enable faster provider review, prioritization, and escalation for QA and compliance teams.

RESEARCH EXPERIENCE

Applied AI Systems Research (Ongoing)

Feb 2026 – Present

- Researching and building platform-agnostic **Full-Stack AI Agents** capable of operating across diverse environments to autonomously plan, execute, observe, and improve multi-step tasks.
- Implemented **corrective** execution loops, **observability** (execution tracing, tool logging), and long-term memory to enable reliable task automation and continuous performance improvement.

WORK EXPERIENCE

SURE TRUST

Remote

Python & Machine Learning Intern

Jul 2025 – Feb 2026

- Built end-to-end ML pipelines including data preprocessing, feature engineering, and model training across 25+ real datasets.
- Constructed ML, DL, NLP and Computer Vision systems/projects using Python and core libraries.
- Designed and deployed TradeGlance, a FinTech forecasting system using Prophet time-series modeling and FinBERT sentiment analysis, processing 10K+ daily records with improved prediction accuracy.

EDUCATION

BANSAL GROUP OF INSTITUTIONS

Bhopal, MP

Bachelor of Technology

Jul 2023 - Present

Major in Computer Science

Cumulative GPA: 7.76/10;

Relevant Coursework: Software Engineering; Operating Systems; OOPs Concept; Data Structures & Algorithms

CERTIFICATIONS & ACHIEVEMENTS

- Government of Madhya Pradesh Academic Excellence Award – Higher Secondary (2023)
- Oracle Cloud Infrastructure Generative AI Professional Certification – 92% (2025)
- Agentic AI (LLM Agents & Agentic Workflows) — DeepLearning.AI (Andrew Ng), 2026

INTERSTS

AI agents, technical blogging, reading, AI systems research, open-source contributions
