Bhopal, India | +91 6263473208 | musaqureshi0000@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

BANSAL GROUP OF INSTITUTIONS

Bachelor of Technology

Major in Computer Science

Cumulative GPA: 7.76/10;

Relevant Coursework: Software Engineering; Operating Systems; OOPs Concept; Data Structures & Algorithms

Bhopal, MP
Jul 2023 - Present

WORK EXPERIENCE

SURE TRUST

Python & Machine Learning Intern

Remote
Jul 2025 – Feb 2026

- Performed end-to-end data cleaning, preprocessing, feature engineering, and EDA across 25+ **real-world datasets** to build reliable ML pipelines.
- Constructed 5+ Machine Learning, Deep Learning, and Computer Vision projects, implementing models and **neural networks** from scratch using Python and core libraries.
- Delivered and deployed, a FinTech forecasting system using Prophet time-series modeling and FinBERT sentiment analysis, processing 10K+ daily records with improved prediction accuracy.

PROJECTS

TRADE GLANCE | [Preview](#)

Jan 2026 – Feb 2026

Python, Streamlit, Prophet, FinBERT, Pandas, NumPy, Plotly, Finnhub/yFinance APIs, LangGraph

- Built an AI-driven FinTech market intelligence platform for **time-series forecasting**, technical analysis, **sentiment modeling**, and automated research.
- Engineered real-time forecasting and sentiment pipelines using tuned Prophet (7–90 day horizons) and FinBERT analyzing 500+ daily financial news articles.
- Improved forecast accuracy by ~18% through feature engineering and integration of 3 technical indicators (SMA, RSI, MACD).
- Developed an **agentic AI assistant** with tool-calling and live search engine for real-time market research and query handling.

POTHOLE.IO | [Preview](#)

Nov 2025 – Jan 2026

React, TypeScript, FastAPI, YOLOv8n-seg (onnx), Supabase (PostgreSQL, Auth, Realtime), Gemini API, Vercel/Railway

- Identified inefficiencies in manual pothole reporting and built a full-stack civic platform enabling citizens to submit geo-tagged reports and track repairs in real time
- Deployed **YOLOv8n-seg** (ONNX) for pothole detection achieving 91% accuracy with ~200ms inference per image.
- Implemented Gemini GenAI for automated report summarization and chatbot assistance, reducing manual effort by ~60%.
- Architected scalable FastAPI backend with Supabase ensuring secure access control and low-latency data synchronization.

END TO END ML PIPELINE USING MLOPs | [Preview](#)

Sep 2025

Scikit-learn, XGBoost, Pandas, MLflow, FastAPI, Docker

- Built an end-to-end fraud detection **pipeline** on 284K+ transactions with <1% fraud rate using scalable preprocessing & feature engg.
- Increased fraud recall from 63% → 91% via **SMOTE** and XGBoost, tracking 30+ experiments with MLflow.
- Productionized a Dockerized FastAPI API for real-time risk scoring and production inference.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL

AI/ML & Data: Scikit-learn, TensorFlow, PyTorch, OpenCV, Pandas, NumPy, MLflow, Matplotlib, Seaborn

Development: FastAPI, REST APIs, React, Streamlit, JavaScript, HTML, CSS, TailwindCSS

Tools & Platforms: Git/GitHub, Docker, Linux (Basics), LangChain, LangGraph, Databricks (Basics), Gemini API/SDK

ACHIEVEMENTS & CERTIFICATIONS

- Government of Madhya Pradesh Academic Excellence Award – Higher Secondary (2023)
- Oracle Cloud Infrastructure Generative AI Professional Certification – 92% (2025)
- Machine Learning Specialization – DeepLearning.AI & Stanford University (Coursera) – In Progress

INTERESTS

AI agents, technical blogging, reading, open-source contributions
